Summary

B.Tech Computer Science and Engineering student at Amrita Vishwa Vidyapeetham, graduating in 2028, with hands-on experience in full-stack web development, AI/ML, cybersecurity, and software engineering. Interested in Software Engineering, Machine Learning, Generative AI, and Agentic AI. Experienced in building and deploying practical projects using React, Python, Streamlit, MySQL, and modern web technologies. Currently strengthening Data Structures, Algorithms, DBMS, Operating Systems, Computer Networks, and other core CS fundamentals.

Education

2024 – 2028	**B.Tech in Computer Science and Engineering** Amrita Vishwa Vidyapeetham	CGPA: 6.58/10
2024	**Class XII** – CBSE	77%
2022	**Class X** – CBSE	87.4%

Technical Skills

Programming	C, C++, Python, Java, SQL
Web Development	HTML, CSS, JavaScript, React.js, Vite, Next.js
AI / ML	Machine Learning, Scikit-learn, Pandas, NumPy, Generative AI, Agentic AI
Backend / Database	Python, PHP, MySQL, REST APIs
Tools & Platforms	Git, GitHub, VS Code, Streamlit, Vercel, Netlify, XAMPP
Core CS	Data Structures, Algorithms, DBMS, Operating Systems, Computer Networks, Computer Organization, Theory of Computation, Digital Logic

Projects

SecuritySim – Cybersecurity Awareness Platform GitHub

Developed an interactive cybersecurity awareness platform designed to educate users about common cyber threats through simulations and game-based learning. Implemented responsive web interfaces and interactive security scenarios, with deployment and domain configuration using modern web hosting platforms.

Fraud Detection AI GitHub

Built a Python-based fraud and scam detection application using machine learning and keyword-based analysis. Integrated text processing and classification techniques with a Streamlit interface to provide real-time fraud-risk predictions.

IdeaMatch – Project Marketplace GitHub

Developing a platform that connects users with suitable project developers based on submitted project requirements. Designed separate workflows for users, sellers, and administrators, including project submission, seller matching, demo management, notifications, and future payment integration.

Pet Services & Care Platform GitHub

Developed a responsive web platform for pet-related services and care using HTML, CSS, and JavaScript, focusing on clean UI design, accessibility, and user-friendly service discovery.

Experience

Open Source / Personal Projects 2025 – Present

Building and deploying software projects across web development, AI/ML, cybersecurity, and full-stack application development.

Achievements & Activities

– Participated in hackathons and software development competitions, working on cybersecurity and AI-based solutions.
– Developed multiple independent projects involving full-stack development, machine learning, and cybersecurity.

Certifications

AI and Machine Learning Internship	Completed a 3-month internship in AI and Machine Learning	2024
Frontend Development Course	Completed a 2-month frontend development course	2024

Additional Information

Interests	Software Engineering, Artificial Intelligence, Generative AI, Agentic AI, Cybersecurity, Full-Stack Development
Career Focus	Software Engineer, AI/ML Engineer, GenAI Engineer, Agentic AI Engineer
